Mercury: 100% mapped

WAZ 31, 2013

At the very end of 2012, MESSENGER obtained the final image needed to view 100% of Mercury's surface under daylight conditions. The mosaics shown here cover all of Mercury's surface and were produced by using the monochrome mosaic released by NASA's Planetary Data System (PDS), as the base. The full resolution mosaics have been made available for download on
