

Commission on Location-Based Services (proposed)

Haosheng Huang and Jukka M. Krisp

ICC 2015, Rio de Janeiro

Location-Based Services (LBS)

- Increasing demand of using maps and geospatial information **anywhere** and **anytime**

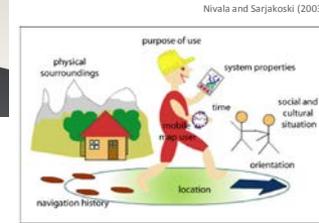

- LBS are (mobile) services that deliver information depending on the location of the device and user.

- Cartography and GIScience play a key role in LBS.

- **Mission of the LBS Commission:** to advance the research on LBS in all its interdisciplinary fields
 - with the aims to enable “anywhere, anytime, for anyone and anything” (4A) services

Focuses and Activities

- Focuses

- Outdoor/Indoor Positioning
- Context and User Modelling
- Communication of Spatial Information (maps)
- Usability, Privacy and Social Issues

- Activities

- Organizing conferences, workshops, special sessions, ...
- Publishing reports, books, special issues, ...
- Cooperating with other ICA Commissions and other research communities (e.g., ISPRS, FIG, IAG)

Looking forward to your participation!
